

Q3 2020

CPFD Software E-Newsletter

Dear Friends of CPFD Software,

As we reach the end of Q3 2020, we are excited to begin a new partnership, bringing Barracuda Virtual Reactor support to Spain. And we are again honored to be nominated as a finalist for the 2020 HP Awards as well as the 2020 IChemE awards. Keep reading to learn more.

### CPFD Nominated as HP Awards Finalist and IChemE Global Awards Finalist

CPFD Software is once again grateful to be nominated as an [HP Awards Finalist](#) in the category of **Best Software Technology**.

*"It's exciting to continue hearing the success stories from our FCCU clients and to see Barracuda Virtual Reactor deployed more widely for other petrochemical applications."*

- [Peter Blaser](#), Vice President CPFD Software

Winners will be announced via an online streaming awards ceremony held at noon CDT on October 1, 2020. [Register online](#), or read more on our [news item](#).

The [IChemE Global Awards 2020 Finalists](#) have been announced and CPFD Software is honored to be nominated in the **Process Automation and Digitalisation** category, sponsored by AVEVA. CPFD's joint entry, together with [ThermoChem Recovery International, USA \(TRI\)](#), is entitled **Digital Technology Enables Novel Waste-to-Fuels Process**.

Winners will be announced through a series of IChemE Global Awards 2020 webinars. The webinar featuring the Process Automation and Digitalisation Award presentation will be held on Thursday, November 12, 2020 from 8:00 AM – 11:00 AM CDT. [Registration is open now](#). Read more on our [news site](#).

Thank you to all our loyal customers and partners. These nominations would not have been possible without you.

### A3V Consulting and CPFD Software Announce Partnership to Provide Barracuda Virtual Reactor® to the Spanish Market

A3V Consulting, a leading engineering solutions firm, and CPFD Software, experts in fluid-particle simulation, are excited to announce a partnership to provide Barracuda Virtual Reactor to the Spanish market. Customers in Spain and neighboring

countries can now contact A3V Consulting for local sales support activities.

To kick off the partnership, A3V Consulting and CPF D Software are planning a web-based training class. Anyone interested in participating in the October/November timeframe should contact A3V Consulting through [their website](#) or [CPF D directly](#).

---

## Upcoming European and North American Training Courses

CPF D's October training class has reached capacity, so we are scheduling two additional web-based classes in 2020, targeting the European and North American time zones.

For the first part of each course, we'll walk through an introduction to the use of Virtual Reactor™ software, including project setup, operating the solver, and post-processing using Tecplot for Barracuda. For the remainder of the course, set up your own project in Virtual Reactor with our engineers on-hand to assist during private break-out sessions.

Contact [training@cpfd-software.com](mailto:training@cpfd-software.com) for more information or to register your interest, as we are finalizing schedules and details now. Click the video below to view a training testimonial from our August class.
